

Plan:

New Features:

① Going

- There's a "going" button on each post, user could click it if she or he wanna go to that event. This makes it easier for manager to count num of people presenting an event.

② Timeline/Reminder

- In user's homepage, there's a button that could list the time of all events the user is going to.

③ filtering/ranking

- Provide some ways for users to filter / sort all events posted. This could be based on events' location, artist, time, and num of people who are going.

④ Explore/Search

- Allow users to search an event by providing title/artist/description

What information or content is in your app?

- user uploaded events info
- # of likes of each event
- Users' comments on each event

What actions would someone take when using your app?

- login
- upload new events
